MOHAMMAD QATAADAH ZAKIR

Software Engineer | AI Engineer

Riyadh, Saudi Arabia (Transferrable Iqama) | **US B-1/B-2 & Canada Visitor Visa Holder — Available for In-Person Interviews**

mqzakir@outlook.com | +966544073146 | https://linkedin.com/in/mqzakir | https://github.com/mqzakir | https://mqzakir.com

PROFESSIONAL SUMMARY

Software Engineer experienced in building scalable backend systems, full-stack applications, and AI-powered software solutions using Python, FastAPI, React, PostgreSQL, Docker, and AWS. Skilled in API development, system integration, workflow automation, and cloud-native technologies, with practical experience in Machine Learning, LLMs, and AI-driven application development.

WORK EXPERIENCE

Software Engineer (AI Focus) – Intern

Al Amthal Co. *May 2024 – August 2024*

- Collaborated closely with product managers, QA engineers, and stakeholders to deliver 10+ software enhancements and automation initiatives, optimizing application performance, resolving critical production issues, and implementing CI/CD and version control best practices that reduced deployment times by 40% and improved release stability.
- Built and debugged web applications using Python, React, REST APIs, and SQL, delivering 5+ client-facing solutions and resolving 40+ reported issues.

Freelance Software Engineer

June 2022 – January 2024

- Architected and optimized scalable AI pipelines for end-to-end model workflows, integrating data preprocessing, embedding generation, and vector database indexing (FAISS/pgvector) with FastAPI-based serving layers, improving retrieval accuracy by ~25% and system throughput by ~30% under concurrent workloads.
- Developed a full-stack online grocery store for a Reddit-sourced client, integrating secure payment processing, delivery tracking, product catalog management, and an intuitive admin panel for real-time inventory and stock updates.

EDUCATION

Software Engineering, B.Eng. (Hons)
University of Greater Manchester | 2025

Computer Engineering, B.Eng.
Memorial University of Newfoundland | 2022

SKILLS

Programming languages – Python, Javascript, Typescript, Bash, C#, Java

Frontend – React, React Native, Vite, Tailwind CSS, HTML5, CSS3, WPF

Backend – FastAPI, Flask, Django, ASP.NET, Node.js, Express.js, REST APIs, WebSockets, Pydantic, SQLAlchemy

Databases – PostgreSQL, MongoDB, Supabase, SQLite

Cloud & Infrastructure – AWS, Docker, Kubernetes, Git, CI/CD, Linux

AI & Machine Learning – Hugging Face, LoRA/QLoRA, RAG, FIASS, Fine-Tuning, llama.cpp, Vector Databases, LangChain, Together AI, Zapier, LangGraph, PyTorch, TensorFlow, Scikit-learn, XGBoost, ONNX

Tools – Postman, OpenAPI, Cursor, VSCode, Linux CLI, Github Actions

Soft skills – Agile, Cross-functional Collaboration, Communication, Client Collaboration, Documentation, Adaptability, Time Management, Emotional Intelligence

PROJECTS

OpenQ – Virtual Queue System

React · Python· FastAPI · Javascript & Typescript · PostgreSQL · Docker

A virtual queue for walk-in businesses. Customers join from their phone, watch their position live, and get notified when it's their turn.

QEMI - AI Code Intelligent Platform

React · Fine-tuning · PyTorch · Javascript & Typescript

A basic debugging tool that provides real-time insights into system performance, resource utilization, and process management, with predictive insights on code and its debugging information.

RAG-Powered NLP System

HuggingFace · LangChain · FastAPI · Docker

Built a document pipeline that ingests, chunks, and augments documents with metadata, then exposes retrieval over them through APIs.

LLM Evaluation & Fine-Tuning Pipeline

Python · PyTorch · LoRA / QLoRA · llama-cpp

Built a benchmarking harness for evaluating model outputs across variants, reproducible fixtures, multi-run comparison, statistical testing, and regression detection.

CERTIFICATIONS

- EDUCBA – AI with Python: Foundations to Projects Specialization
- DeepLearnin.AI – Deep Learning Specialization
- Duke University – MLOps | Machine Learning Operations Specialization
- Stanford Online – Machine Learning Specialization
- HarvardX - Computer Science for Python Programming
- HarvardX - Computer Science for Artificial Intelligence
- IBM – AI Chatbots without Programming
- IBM – Python basics for Data Science
- IBM – AI Applications with Watson
- University of Minnesota – Software Development Lifecycle
